

Panka Fotovoltaica

Introduction

Panka Fotovoltaica, developed in collaboration with Pradella Sistemi, is one of the installations realized within the project Bergamo Wifi Isole digitali, in seven of the city quarters. It has integrated PV modules, supplying electronic devices, the Wifi connection, sensors, a smart lighting system, and an information totem (Pila) connected to further devices.

PROJECT DATA

Project type	new construction
Building use	urban furniture
Building address	Bergamo (BG), Italien

BIPV systems

BIPV SYSTEM DATA

Integration year	2020
Active material	monokristallines Silizium
Module transparency	opaque
Module technology	glass-glass, hidden PV, customized modules
System power [kWp]	0,16

BIPV SYSTEM COSTS
